2. At schools

Creative Collaboration Starts At School

[LEARN MORE](#)

It All Starts With The Dream

Change starts with a dream and realizing it requires a collaborative effort to fuse your passion with our experience. To begin with, we setup a guide to design the space, The Dream Reality Document.

An Infrastructure
Designed To Inspire

A space is not just a physical area, but encompasses an inspiring and creative atmosphere that opens up the mind. It includes design architecture and furnishing the Space. Our design thesis follows an approach that triggers emotions of curiosity and excitement in a kid.

Time To Gear Up

Chiseling a dream requires the right gear. From the wheel that started it all to robots that may share our world in the future, *Billie Spoons* has all the tools required to

The Rubberband Curriculum

A hands-on approach that allows students to freely experiment with their ideas results in involved learning; it helps them internalizing the 'why' along with the 'what'. This Rubber Band methodology enables flexibility with open-endedness.

Our Mentors Help Keep It Going

Obstacles are a part of an innovator's journey. An expert mentor can nudge the kid to bounce back faster. Our mentoring process is designed to help kids be self-reliant.

3. Partnerships

The Future is Now. Be The Pioneers

The limitless potential of a child has never been harnessed by schools and formal education systems. Even when the whole world is waking up to newer and better future skills, the schools still remain sluggish. Many of us as parents feel this void but are stuck with existing templates of education. This presents itself an opportunity for pioneering businessmen to wear the educator's hat and come up with spaces which can front-end the much-needed change and create large scale social impact.

We Work To Create These Smiles

The potential we see in every kid to be an innovator has driven us on a long journey of over a decade. Our work with hundreds of schools spanning thousands of educators and students resulted in a deep-rooted understanding of what it takes to build a better culture.

This reflects in every thing we deliver from cutting edge products, inspiring design spaces to simplified & flexible curricula and smart mentoring.

If working with people who genuinely value education, foster profitable partnerships and who collaborate to develop future solutions, is your priority, then you can find

Our Partnership Models

Collaborative Mentoring

Using collaborative mentoring from your child's school, which can be used as training content, to help learning content, training, future of innovation programs.

Events & Retail EdTech Partnerships
